

To Whom it may concern: As a paying customer of XM radio service I am very unhappy with the programming efforts of local AM and FM radio service. I have been unhappy for a long time and have been waiting for something better. This something has been XM radio. I simply ask that regarding the 'NAB petition 04-160' you please take into consideration the fair ability to compete in the space of local radio programming as an opportunity for the free radio service to improve itself to the point of realistic competition based on the merits of the service offered and not a government sanctioned monopolistic position that takes away my right to hear relevant programming from whomever I desire.

With Regards.
